## FISCAL ANALYSIS

### ASSUMPTION

Officials of the **Department of Revenue (DOR)** state this legislation clarifies that the pension exemption will apply only when the pension is included in the taxpayers federal adjusted gross income and not otherwise subtracted.

This proposal would have little or no administrative impact to the Department of Revenue.

Officials of the **Office of Administration (COA)** state that currently taxpayers that have Railroad Retirement Benefits can subtract their retirement benefits from their adjusted gross income on their Missouri income tax return. These same taxpayers may currently also take the pension exemption on the Missouri income tax return. This proposal does not allow the pension exemption for Railroad Retirement Benefits, because they are already excluded from adjusted gross income. This would eliminate deducting the benefits twice.

According to Table 545 in the 1999 Statistical Abstract, Railroad Retirement Benefits are \$8 billion nationally. COA staff assume that 1.9% of this total is paid to Missourians. A 4.5% marginal tax rate was assumed.

According to the actuary section of the Railroad Retirement Board, there are approximately 315,100 railroad retirees nationally. Dividing \$8 billion by the 315,100 retirees yields an average pension of \$25,400 annually. **Oversight** assumes that 1.9% of the 315,100 retirees (5,987) are located in Missouri. The maximum amount of the pension exemption is \$6,000. **Oversight** has calculated the revenue impact of this proposal by multiplying the \$6,000 by 5,987 retirees and assuming a 4.5% marginal tax rate. This would yield a savings of \$1,616,490 annually by eliminating the ability to deduct Railroad Retirement Benefits twice.

**This proposal would result in an increase in Total State Revenues.**
